

## Famoso 1000 RF (Radio Frequency)

### SPECIFICATION SHEET

### PRODUCT/ORDER CODE

FAMOSO1000RF single channel 5 Amps

The Famoso 1000 RF is a radio frequency timed room thermostat, comprising a battery-powered transmitter, and remote mains powered receiver. Famoso 1000 will control two temperature levels continuously, over each 24 hour period. Each day can be programmed differently if required. Programmability gives a 'comfort level' temperature control during times when the property is occupied, and 'set-back' temperature control at other times.

Famoso 1000 has just four push-buttons for all operations, and a large l.c.d. display which shows weekday, time, current setting (comfort or set-back) ambient temperature and programme in the form of a clear graphic image.

### Transmitter (Tx)

### Technical specification:

#### **System:**

868MHz frequency

auto-selection of communication code: 9 million codes

< 30m range in buildings; < 100m range in free space

Proportional Integrative control technique, using pulse width modulation to achieve set point control.

#### **Transmitter:**

4 pre-set programmes; < 7 own programmes

½ hour minimum programming increment

Temperature control range: 5 – 30°C

Week-day; time; ambient temperature display

Daily programme bar-chart display

Power supply: 2 x AA alkaline

### Receiver (Rx)

#### **Receiver:**

Wall-mount; 230V 50Hz supply requirement

Volt-free changeover switch, rated 5 (1) Ampere

i.e.d. status indicator
