

Pipe/Cylinder Thermostat 240V / 16A

Single pole changeover thermostat with switch contacts complete with cable clamp, it is particularly suitable for measuring temperatures on heating plant pipes and Domestic hot water tanks. Thermostat clamping is achieved by means of spring-band, assuring good contact and fixing to pipe or tank surface.

Connection Detail:

Terminal (1) = Common

Terminal (2) = Normally Closed (Call).
(Opens the circuit with increasing temperature)

Terminal (3) = Normally Open (Satisfy).
(Closes the circuit with increasing temperature)
