

PRODUCT DATA SHEET

High level plume management circular terminal guard

For the heating season 2018/19 there will be new versions of Tower Flue high level plume management circular flue terminal guards. To maintain the highest Health and Safety level, an additional mesh is being added to fully enclose the flue inlet. And a high-level version of our most popular CGDK6 guard is being added to the range.

The mesh is a separate component supplied with the cut-out guard, and secured on-site behind the flue exhaust pipe quickly and easily with two cable ties, which will be included in the delivery.

All variants are of mild steel woven mesh construction, with a durable low density polyethylene (l.d.p.e.) brown plastic coated finish

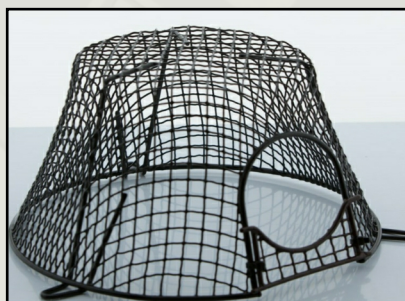

High level guards without additional mesh will be discontinued.
The CGDK3HKBL was finished in black l.d.p.e., which will change to brown.

- Suitable for condensing gas boilers
- Brown plastic coated
- Now with additional mesh to enclose the inlet

Diameter. x depth: **10 x 4.5" (255 x 115mm)**

Product code CGDK1HLBRM

Diameter x depth: **11 x 6.5" (280 x 165mm)**

Product code CGDK3HLBRM

NEW PRODUCT

Diameter x depth: **11.5 x 9" (290 x 230mm)**

Product code CGDK6HLBRM
