

# Tower STTRS1

## Room Thermostat

The Tower STTRS1 is a dial-type mechanical room thermostat for regulation of room temperature. With neutral housing to blend in to any style decor

Designed for wall mounting, with 60mm fixing centres for back-box compatibility, and suitable for in-wall or surface-run wiring connection. The thermostat cover incorporates four breakouts for surface-run conduit. The temperature regulation mechanism is the well-proven sealed bellows system.

- Temperature Range - 10— 30<sup>0</sup>C
- Differential - 1<sup>0</sup>C
- Contact rating - 10 (3) Amperes
- System compatibility - Mains or low-voltage
- Suitable for combi boilers - Yes
